

# DARRYL ZORRILLA

## Senior Full-Stack & Mobile Engineer

Los Angeles, CA · [djzorrilla@yahoo.com](mailto:djzorrilla@yahoo.com) · [linkedin.com/in/djzorrilla](https://www.linkedin.com/in/djzorrilla) · [github.com/djzorrilla](https://github.com/djzorrilla)

### SUMMARY

Full-stack engineer with 15+ years shipping production software and 15+ launched applications. Architect end-to-end consumer products—from native iOS and React Native apps to NestJS APIs, real-time systems, AI pipelines, and cloud infrastructure. Progressed from iOS developer to lead engineer at ISBX, owning product lifecycles for clients including **Apple (Beats by Dre)**, **Red Bull**, and **Ojo Electric**. Proven ability to take products from concept through mobile, backend, CMS, infrastructure, and production launch.

### PROFESSIONAL EXPERIENCE

#### ISBX — Lead Full-Stack Engineer

2023 – Present

*Promoted to lead full-stack engineering across mobile, API, and infrastructure.*

- Architect and deliver **3 greenfield products simultaneously** (Schoolyard Social, ScareScore, FriendlyBet), each with a React Native app, NestJS API, React CMS, and Terraform-managed AWS infrastructure.
- Designed a **real-time competition engine** with scheduling, brackets, round robins, WebSocket scoring, and leaderboards for Schoolyard Social, now supporting 500+ tournaments and 10,000+ players across nine sports.
- Built end-to-end **Stripe payment and subscription billing** systems across multiple products, handling recurring revenue, refunds, and webhook event processing.
- Established **monorepo architecture patterns** and CI/CD pipelines that reduced deployment time and enabled shared code across mobile, web, and API packages.
- Define technical roadmaps, lead sprint planning, conduct code reviews, and mentor a team of 3–5 engineers.

#### ISBX — Senior Mobile Engineer & Architect

2018 – 2023

*Led mobile development for enterprise clients, expanded into full-stack backend ownership.*

- Delivered **8+ production mobile apps** for clients including Red Bull, Ojo Electric, HED, SoundFi, and Vurple — from architecture through App Store / Google Play deployment.
- Engineered the **Ojo Electric iOS app** with IoT scooter telemetry, GPS fleet tracking, and Stripe billing for an electric scooter rental service featured in Forbes.
- Built the **Red Bull Radar** mobile platform, delivering location-aware content feeds and real-time push notification campaigns for branded events and athlete content.
- Developed the **HED Unity** native iOS app integrating CoreBluetooth BLE pairing, real-time DSP audio EQ, and over-the-air firmware updates for premium headphones.
- Created **Vurple**, a civic engagement livestreaming platform with WebRTC video, real-time Q&A, and audience polling for elected officials.

#### ISBX — iOS & Mobile Engineer

2014 – 2018

*Foundation years building native iOS apps and backend APIs.*

- Developed the official **Apple (Beats by Dre) Beats Pill+** companion iOS app — Bluetooth LE device discovery, multi-speaker sync (DJ & Stereo modes), and hardware state management.
- Built **SoundFi**, an immersive 3D spatial audio app for movie theaters, handling audio session management, headphone routing, and synchronized playback.
- Architected **Linktune**, a universal music streaming app integrating Spotify, Apple Music, and SoundCloud APIs with a custom Node.js backend.
- Led development of **Ribbon**, a long-running event ticketing platform encompassing native iOS, React CMS, API services, and mobile applications.

#### Freelance Web Developer & Designer

2010 – 2013

*Independent — Designed and built custom websites for local businesses.*

- Delivered full-stack web solutions for small business clients, establishing core skills in HTML/CSS/JS, UX design, and client communication.

### ADDITIONAL PROJECTS

**Rekxy** — Solo-built AI food discovery platform that converts videos into verified, mapped restaurant and dish recommendations · **Inventory** — B2B inventory management platform with real-time WebSocket sync for high-volume sellers · **Odeon** — Native iOS app + Next.js web platform with custom database architecture · **GuardGrabber** — On-demand security services marketplace (React, Next.js, NestJS) · **File Keepers** — Document management app for enterprise shredding/storage services · **Pikkup** — On-demand delivery and moving platform with iOS and web apps

### TECHNICAL SKILLS

|                          |                                                                                                   |
|--------------------------|---------------------------------------------------------------------------------------------------|
| <b>Languages</b>         | TypeScript, JavaScript, Swift, SwiftUI, Objective-C, Python, GraphQL, HTML/CSS                    |
| <b>Frameworks</b>        | React, React Native, Expo, Next.js, NestJS, Node.js, Loopback, gRPC, WebSockets, WebRTC           |
| <b>Cloud &amp; Infra</b> | AWS (S3, CloudFront, EC2, Lambda), GCP, Cloudflare Pages/R2, Terraform, Docker, Firebase, CI/CD   |
| <b>Databases</b>         | PostgreSQL, MySQL, Redis, TypeORM, Database Design & Optimization                                 |
| <b>Integrations</b>      | Google Gemini, Google Places, HealthKit, Stripe, Plaid, Twilio, SendGrid, Google Maps, Apple Maps |

## EDUCATION & CERTIFICATIONS

---

### George Mason University

*B.S., Applied Information Technology — Database Management & Programming*  
2010 – 2012

### Certified ScrumMaster (CSM) — Scrum Alliance

Credential ID: 000739089 · Issued Jan 2018

### Northern Virginia Community College

*Associate's Degree, Information Technology*  
2008 – 2010
