

Darryl Zorrilla

Los Angeles, CA | [LinkedIn](#) | dzorrilla@isbx.com

Summary: Experienced Full-Stack and Mobile Software Engineer with a demonstrated history of delivering high-quality, scalable applications. Over a decade of experience at ISBX building robust APIs, CMS platforms, and cross-platform mobile applications for high-profile clients and startups.

Professional Experience

ISBX Senior Full Stack Software Engineer

Jan 2014 – Present

- Lead development and architectural design for multiple client applications, specializing in full-stack web development, mobile application development (iOS), and cloud infrastructure (AWS).
- Architect efficient and scalable systems that drive complex applications, establishing ownership of components, features, and systems with expert end-to-end understanding.
- Applicable experience building applications in Objective-C and Swift for the iOS platform within an Agile environment.
- Identify and resolve performance and scalability issues, driving large efforts to reduce technical debt and optimize code for quality and efficiency.
- Provide feedback to peers during code reviews, set direction and goals for teams, lead major initiatives, provide technical guidance, mentorship, and help onboard new team members.
- Collaborate with cross-functional teams (product, design, operations, infrastructure) to build innovative application experiences and implement custom user interfaces using the latest programming techniques.
- Work on a variety of coding languages and technologies, highly comfortable working with RESTful APIs, writing unit tests and testable code, and managing CI/CD pipelines.
- Enjoy working in a collaborative team environment to deliver high-quality software products.

Projects

CYNQ | Senior Software Engineer

Jan 2026 – Present

- **Technologies:** Node.js, NestJS, React, React Native, AWS, Docker
- **Description:** Lead development for the CYNQ ecosystem encompassing a robust backend API, mobile application, and CMS platform. Implemented secure cloud infrastructure and media processing workflows utilizing AWS (S3, CloudFront).

Friendly Bet | Lead Software Engineer

Sep 2025 – Present

- **Technologies:** React Native, React, Node.js, NestJS, AWS
- **Description:** Full-stack development for the Friendly Bet platform, building a seamless mobile application, backend API, CMS, and scalable AWS infrastructure.

Schoolyard Social | Lead Software Engineer

Jan 2025 – Present

- **Technologies:** React Native, React, Node.js, NestJS, AWS
- **Description:** Served as the lead engineer developing a comprehensive tournament management application. Built a cross-platform React Native app (iOS & Android), designed backend APIs, built out the CMS, and managed deployments.

Inventoryy | Senior Software Engineer

Feb 2024 – Jan 2025

- **Technologies:** React, Node.js, AWS, WebSockets
- **Description:** Built a robust inventory management software solution for online sellers. Developed the REST API, B2B web interface, and integrated real-time socket communications.

Odeon | Senior Software Engineer

Jun 2023 – Feb 2024

- **Technologies:** Native iOS, Next.js, React, NestJS, Database Design
- **Description:** Engineered the Odeon platform, including a native iOS app, website, backend API, and CMS. Focused on scalable database design and seamless user experiences.

GuardGrabber | Lead Software Engineer*Jun 2022 – Oct 2024*

- **Technologies:** React, Next.js, Node.js, NestJS, AWS
- **Description:** Developed an on-demand professional hiring platform for security services. Built the web application, backend API, and CMS.

Vurple | Senior Software Engineer*Jan 2022 – Jun 2022*

- **Technologies:** React Native, React, Node.js, NestJS
- **Description:** Created a mobile platform for Elected Officials and Ambassadors to host video live streams with followers. Additionally designed backend APIs, built out the CMS, and managed deployments.

HED Unity | Senior Software Engineer*Aug 2020 – Dec 2021*

- **Technologies:** Native iOS, Swift, gRPC
- **Description:** Developed the HED Unity native iOS application to integrate and control high-fidelity Wi-Fi enabled headphones.

Ojo Electric | Lead Software Engineer*Aug 2018 – Aug 2020*

- **Technologies:** Native iOS, Node.js, NestJS, Serverless
- **Description:** Engineered native iOS applications and serverless backend architecture for an electric scooter rental service, alongside designing APIs, building out the CMS, and managing deployments.

SoundFi | Software Engineer*Dec 2017 – Feb 2020*

- **Technologies:** Native iOS, Node.js, NestJS, React
- **Description:** Built a mobile app providing an immersive 3D sound experience. Architected and developed the CMS and backend APIs, and allowed users to sync and enhance movie audio through personal headphones while in theaters.

Red Bull (Co-Pilot & Radar) | Lead iOS Engineer*Jun 2017 – Jan 2024*

- **Technologies:** Swift, SwiftUI, iOS
- **Description:** Developed internal mobile applications for Red Bull, including Co-Pilot (a social/event management iOS app) and Red Bull Radar.

File Keepers | Lead Software Engineer*Nov 2016 – Apr 2017*

- **Technologies:** Native iOS, Node.js, Loopback
- **Description:** Developed a management application for a Los Angeles-based shredding and document storage service, which included API design, CMS development, and managing deployments.

Pikkup | Software Engineer*Jan 2015 – 2016*

- **Technologies:** Native iOS, Node.js, Loopback
- **Description:** Built native iOS applications and web platforms for a transportation service. Oversaw API design, built out the CMS, and managed deployments.

Beats Pill+ | iOS Software Engineer*Aug 2015 – Dec 2015*

- **Technologies:** Native iOS, Swift/Objective-C
- **Description:** Developed the official native iOS application to control, customize, and update the Beats Pill+ speaker device.

Ribbon | Lead Software Engineer*Jan 2014 – Jan 2022*

- **Technologies:** Native iOS, Node.js, NestJS, React
- **Description:** Served as the lead software engineer for a long-running platform encompassing ticketing, CMS, API services, and mobile applications.

Linktune | iOS Software Engineer*Jan 2014 – Jan 2015*

- **Technologies:** Native iOS, Objective-C, Node.js, ExpressJS, SoundCloud, YouTube, Spotify
- **Description:** Architected and developed a universal music streaming application integrating multiple third-party provider APIs to seamlessly search, play, and share media. Engineered the robust backend APIs, scalable web infrastructure, and the native iOS client.

Additional Skills

- **Languages:** TypeScript, JavaScript, Swift, SwiftUI, Objective-C, Python, GraphQL
- **Frameworks & Libraries:** React, React Native, Expo, Next.js, NestJS, Node.js, Loopback, gRPC, WebSockets
- **Infrastructure & Cloud:** AWS (S3, CloudFront, EC2, Serverless), Docker, Firebase
- **Third-Party Integrations:** Stripe, Plaid, Google Maps, Apple Maps, SoundCloud, YouTube, Spotify
- **Databases:** PostgreSQL, MySQL, Database Design
- **DevOps / Deployment:** Apple App Store & Google Play Store Deployment, API & Website Deployments

Education

George Mason University Bachelor's degree, Applied Information Technology - Database Management & Programming	2010 – 2012
Northern Virginia Community College Associate's degree, Information Technology	2008 – 2010

Certifications

Certified ScrumMaster (CSM) - Scrum Alliance Credential ID: 000739089	Issued Jan 2018
